Software Developer skilled in Java, Python, Full-Stack Development, and secure REST API design. Experienced in React, Angular, Spring Boot, Node.js, and SQL/NoSQL databases with strong focus on authentication systems, analytics dashboards, and UI/UX-driven applications. Proficient in writing clean, scalable, production-ready code.

Srinivas University Institute of Engineering and Technology
Bachelor of Technology in Computer Science & Engineering, CGPA: 8.49/10.0
SDPT PU College
Pre-University Course (PUC), Percentage: 78.8%

Mangalore, India
Expected May 2026
Mandarathi, Udupi, India
2022

Languages: Java, Python, JavaScript, TypeScript, HTML, CSS, SCSS
Frontend: React.js, Next.js, Angular, Tailwind CSS, shadcn-ui, Vite
Backend: Spring Boot, Node.js, Express.js, FastAPI, Flask
Databases: MySQL, PostgreSQL, MongoDB, MongoDB Atlas
Security: JWT Authentication, BCrypt Password Hashing, Role-Based Access Control
Cloud & Tools: AWS, Docker, Kubernetes, Git, GitHub, Postman, Linux, Render, Cloundinary

Full-Stack Development Intern May 2025 – Aug 2025
EyeQ Dot Net Pvt Ltd Mangalore, India

- Built full-stack modules using Angular, Node.js, Express.js, and MySQL to deliver scalable web applications
- Developed and optimized RESTful APIs, improving overall performance by approximately 20%
- Implemented secure authentication and role-based access control systems using JWT and BCrypt
- Participated in Agile sprints, conducting code reviews and debugging complex issues

Online Job Portal Management System <i>Angular 21, TypeScript, Node.js, Express.js, MongoDB, JWT</i>	2025
- Developed premium recruitment platform with modern dark-themed UI featuring glassmorphism design and smooth animations - Implemented multi-step job posting workflow and dynamic search filters with real-time updates - Built RESTful APIs with JWT authentication and BCrypt password hashing for secure user sessions - Designed responsive dashboard with interactive statistics and trend indicators for job search visualization - Deployed full-stack application on Render with MongoDB Atlas integration and automated CI/CD pipeline	
AgriMarket - Agricultural E-Commerce Platform <i>React, Vite, Python, Flask, MongoDB, Cloudinary</i>	2025
- Built comprehensive agricultural marketplace connecting farmers directly with consumers, eliminating middleman costs - Developed secure user authentication system with role-based access control for multiple user types - Implemented image upload functionality with Cloudinary integration for product listings and user profiles - Created RESTful API endpoints for product management, order processing, and real-time inventory tracking - Deployed scalable application architecture on Render with optimized build processes	
Cartify Global Market - E-Commerce Solution <i>React, TypeScript, Node.js, Express.js, shadcn-ui</i>	2025
- Developed modern e-commerce platform with responsive UI using shadcn-ui components and Tailwind CSS - Implemented shopping cart functionality, user authentication, and secure payment processing workflows - Built scalable backend APIs with Express.js for product management and order processing - Integrated TypeScript for enhanced code quality and developer experience across frontend and backend - Configured deployment pipeline with separate frontend and backend hosting on Render
